## Reaction Characteristics

The Control Zone's all new ***NControl***™ reactive coverstock developed jointly by Brunswick and Bayer is a special formulation designed for the stronger player on broken down lane conditions. For higher rev players, the Control Zone will be cleaner and less sensitive to track breakdown in the front part of the lane and have better backend recovery than PowrKoil 19. The ***NControl*** coverstock complements PowrKoil 19 by providing the reaction power players need when the lanes breakdown. Players with more normal rev-rates will see a medium hook potential performance that is best suited for medium to dry conditions.

## Drilling Information

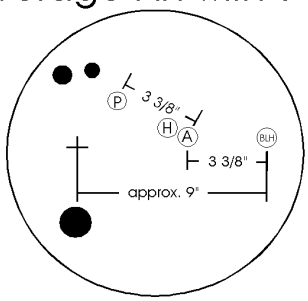

All weights of the **Control Zone™** can be drilled using the techniques developed for two-piece balls. See Brunswick's "Seven Popular Layouts" for detailed drilling information.
