BRUTE™

ALL-PURPOSE

COVERSTOCK

Fortify Hybrid Reactive coverstock is Brunswick's hottest creation based off our performance enhancing additive chemistry technology. **Fortify Hybrid Reactive** combines a new base coverstock with an enhanced additive package that will provide the easiest length with the quickest lateral traction of any coverstock to date.

CORE

The new **Brute Low RG/Low Differential Symmetrical** core features a compact design to provide maximum energy retention. The new core shape revs quicker producing maximum performance and drilling versatility.

BALL MOTION

With its Royal Shine Finish, the **Brute** skids effortlessly through the front, revving strong in the mid-lane saving axis rotation for the backend to provide greater entry angle to the pocket for superior pin action. The **Brute** will provide maximum length with exceptional backend punching out pins on variety of light to medium oil lane patterns.

REACTION SETUP

The **Brute** can be drilled using the standard drilling techniques developed for symmetric core bowling balls.

LIGHTWEIGHT ENGINEERING

At Brunswick, the unique core shape of each individual ball is used for weights from 14 to 16 pounds. This approach to lightweight ball engineering provides bowlers with consistent ball reaction characteristics across this weight range. At 12 and 13 pounds, Brunswick uses a generic core shape with a RG-differential that is close enough to the 14 to 16 pound shape so the same drilling instructions can be used.

	16 LB	15 LB	14 LB	13 LB	12 LB
RG-MAX	2.511	2.523	2.539	2.614	2.637
RG-MIN	2.479	2.491	2.507	2.574	2.597
