The Kingpin Max features a new innovation in outer core technology called **DynamiCore**. This leap in bowling ball technology is a more durable outer material that yields less compression upon impact increasing hitting power and creating an undeniable difference in sound and pin carry. **DynamiCore** is blue and will be noticeable when drilling into the Kingpin Max.

Kingpin Max features the ECA-X coverstock, an advancement in composite technology, for more traction compared to original ECA. The Kingpin Max also utilizes Brunswick's innovative DynamiCore technology which has proven to produce 12% more hitting power over balls without this unique outer core blend.
