MEANSTREAK™ BRAWLER

HP High Performance

COVERSTOCK

The **Addaptive *f* (P+F) Hybrid** coverstock is Brunswick's newest advancement in performance enhancing additive chemistry. *f* (P+F) Hybrid describes our latest formula which we combine our proven *f* (P+F) solid with a pearl creating a highly versatile coverstock. This new formulation produces easy length through the heads and mid-lane, while maintaining traction on the backend for a strong continuous arc.

CORE

The new **Meanstreak Medium RG symmetrical** core features a long and lean design to provide maximum energy retention. By increasing the mass around the equator compared to the original Meanstreak High RG core, the maximum RG is lowered further stabilizing the dynamics to increase the mid-lane traction of the core.

BALL MOTION

With its Rough Buff finish, the **Meanstreak Brawler** skids easily through the front part of the lane, revving strong in the mid-lane for a strong continuous breakpoint. This combination of coverstock and core creates an extremely versatile motion on medium dry to medium oily lane conditions.

REACTION SETUP

The **Meanstreak Brawler** can be drilled using the standard drilling techniques developed for symmetric bowling balls.

LIGHTWEIGHT ENGINEERING

At Brunswick, the unique core shape of each individual ball is used for weights from 14 to 16 pounds. This approach to lightweight ball engineering provides bowlers with consistent ball reaction characteristics across this weight range. At 12 and 13 pounds, Brunswick uses a generic core shape with a RG-differential that is close enough to the 14 to 16 pound shape so the same drilling instructions can be used.
