The Tenacity features a new innovation in outer core technology called **DynamiCore**. This leap in bowling ball technology is a more durable outer material that yields less compression upon impact increasing hitting power and creating an undeniable difference in sound and pin carry. **DynamiCore** is blue and will be noticeable when drilling into the Tenacity.

Brunswick expands the Flip limits to an all time high! **Tenacity** merges our all new coverstock UR (Ultra Responsive) with our Tenacity core featuring DynamiCore to produce the highest backend rating ever seen in a Brunswick ball. Designed for oily lane conditions, the **Tenacity** will provide exceptional length with the quickest response to friction that will turn heads!
